

Product Fact Sheet

ProVeganix

ProVeganix has been developed and optimized for growers and professional users growing any type of horticultural or agricultural crop – whether its open field, hydroponic or greenhouse based. ProVeganix protects, strengthens and vitalizes your plants. 100% natural.

Nutrient composition

ProVeganix is rich in micronutrients as well as fungi and mycorrhizae, which are made up of microbes gained from green waste compost.

Benefits for your crops

Together with growers from all over the world we develop organic nutrient/plant and soil amendment programs which result in higher yields through improved soil health and lead to a more sustainable way of growing.

1. Overall soil quality improvement
2. Longer, thicker and stronger roots
3. Dramatic reduction in pesticide use
4. Reduced fungicide use
5. Reduced irrigation and hydration expense
6. Reduced fertilizer use
7. Restoration of decaying segments
8. Odorless application
9. Decreased fruit drop
10. Increased crop yield, from year to year
11. Induces larger leaves and thicker canopies
12. Microbial protection of the tree-root system (rhizosphere)
13. Promotes a healthy uniform bloom
14. Invigorates severely infected trees
15. Compliance with the strictest watershed-protection regulations
16. Decrease in soil erosion and runoff
17. Cost-effective application and delivery
18. Simple storage
19. Usable on USDA-organic crops (OMRI-certified and registered)

Everything your plant needs

ProVeganix liquid is produced from quality-controlled amounts of biological microorganisms, derived from green waste. Humates, humus, and humic acids are sequestered from biomass and vitalized before they are introduced into the fermentation process.

Trace elements include the common:

Calcium (Ca)

Manganese (Mn)

Iron (Fe)

Magnesium (Mg)

Molybdenum (Mo)

Copper (Cu)

Boron (B)

Zinc (Zn)

Chlorine (Cl)

Sodium (Na)

Cobalt (Co)

Vanadium (Va) and Silicon (Si) for maximum nutrition.

OMRI listed® - For Organic Use

The OMRI Listed® Seal assures the suitability of products for certified organic production, handling, and processing under the following conditions:

- For certified organic farmers, the product must be included in the operator's approved organic system (farm) plan.

- Product use must be in accordance with any restrictions described in the OMRI Products List® under the product's category.
